THE MILE MAID LAMENTS.

THE CITY.

THE ONARGA POST OFFICE THIEF.—The young

man Powers, who was arrested a week since for presenting a forged and stolen draft to Mr. Bond clothier, of this city, was on Friday examines before U.S. Commissioner Hoyne, and commit

Republicans as Douglas men in the gathering of from ten to twelve hundred. The Fair having closed this afternoon, many had gone home, leaving a much less number of strangers in town and giving a smaller audience than Little Dug would have had on any previous evening of the week. To all intents and purposes the meeting was thus ominous in being "one day after the Fair."

The cheer that followed this allusion to Republicans present, suddenly convinced the speaker that he had mistaken his crowd, and the next use of the words "Back Republicans" caused a break. "Take that back," "White Republicans," "No hard names," "Harrah for Lincoln, "Aco, brought him to deceny rapidly, and he eimse zerour degrees north with his speech and his argument.

A little after scene created more stir. Among the cheers for Lincoln, a lady's voice from an adjoining balcony said, "Harrah for Lincoln." This brought more cheers for Lincoln, and little Dug got anazy. He said, "This is the scheme of the Black Republicans, to send their wives and daugh ters when they dare not come themselves, to disturb my meeting;" and asking further, "If there were not Democrate enough present to celear that baleony."

This caused a finitering in the balcony and more cheers below, but nothing farther. If Little Dug takes it ill that Republicans cheered at "his meeting," he will remember that his gross insults on this ga on other occasions were the first to avince, and not for his gratification, just the program of the coloning, while it gives them an alabaster whiteness, not obtained by any compound; & is in emperty of the section of the section of the coloning of the coloning of the section of the section

For Superintendent of Public Instruction HEWTON BATEMAN. For Congress 2d District.

a spiritude, character and the despe-ortal Fathers of the Republic, and the despe-te political tricksters of the hour; wide and ep as the gulf which separates a Douglas from

for the Ordinance of 1767, we have almost the aighest human authority in favor of excluding Slavery from the Territories. And shall that opinion be reviewed and revised? It is for the pinion be reviewed and reviewed an incom-orthwest to answer. Are we convinced that as policy of Jefferson and the Fathers was group? Would these great Northwest States a more rich or powerful if they were Slave tisses? No man in his senses can say they

with and greatness to the Ordinance of Free m, repudiate and condemn that great work? a she, the child of free institutions, raise her ad against the father who begat her and its down the mother who begat her? Will reject the wise committee the property of the price of the pric ent to her own honer, so degraded an

r has responded to Douglas' appeal He was with Douglas at St. Louis , also with him at Belleville, at Water-hester, and at Jonesboro. He made tor, he would feed fat his ancien where he rehearsed his hostile intent old his audience that he would be on hand to reply, and amused them with an ima-ginative picture of the contest. On Eunday morning, Linder commenced preparing for the fray. How he prepares for such encouners is well known throughout the State. In power.

this instance, he took on more of the "prepathis instance, he Linder was soon hors du combat. Before the semove him from the source of such potent napiration, to prevent his unseemly exhibi-ions upon the streets. Douglas took his licomitted champion with him to Chester,

force and effect on the minds of those who read the Douglas papers. He, along with certain ama-teurs, carried out these instructions faithfully in the Ottawa debate, putting words in Mr. Lin-coln's mouth which he never uttered; garbling and emasculating what he did say. We detected and denounced the miserable trick at the time. The exposure had the effect to cause the fellow to be less reckless in his perversions of Lincoln's speeches at Freeport, although on that occasion he slipped in as many errors as he dared without

business on the part of Dongias to direct or allow life reporters to treat his opponent in this base and shameful manner.

The London Times, in its issue of the 30th ult., grambles through a long leader over the fact that the United States and Russia, who and only acted "the part of go-betweens," leaving England and France to do the fighting, should have shared fully in all the ad-

the Thunderer goes on from this point to show that Russia, instead of eccupying the guentinious position above referred to, and in danger of being driven out of the Allies' path, has actually, by virtue of force and di-plomacy, acquired a large silee of territory from China, occupying a most commanding position with regard to future operations— acquired it, too, at the very time France and Eagland were fighting to secure what may not improbably turn out a harron mister. not improbably turn out a barren victory. It is known that previous to the late treaty between Russia and China "the frontier line between Chinese Mongolia and Siberia had the maps as the Jablonnoi mountains, near-ly five hundred miles to the north of the By means of some military operations which have not obtained much publicity in Europe, and are known only by passages in Pekin Gazettes which speak of the fabrication of arms and gunpowder to resist the linearsion of barbarians into Mongolia, the Busians have occupied all that interening "territory,"—a district of country about double the extent of the British islands, and stered by several tributaries of the Amoor

watered by several tributaries of the Amoor River, a large navigable stream, up which the Kussian Government has just sent an ex-pedition to look after the old colonies planted upon its banks, and probably to establish new ones and otherwise confirm the Russian the late treaty arrangements with the Chinese Government. Her position upon the Amoor Empire. The important difference between the positions of Russia and the Allies is, that while the concessions made to the latter will have their fulfilment opposed by the thousand arts of duplicity and the wearying delays inceparable from the stereotyped policy of the Chinese Government, the former able to enforce most of its demands. Russia was, it must be confessed without helds betterned. it must be confessed, rather badly battered at Sebastobol; but she has worsted the Allies

The Captain of the Echo and his Crew. Capt. Townsend, the commander of the slaver, lately captured by the Dolphin, is a native if Bhode Island, and has a wife and three children residing in Providence. The Tribune of that city thus describes him and his operations:

He is about 33 years of age, and a man of superior address and education. He is tall and well formed and has prepossessing features. He has light pair, large sandy whickers, and is scripulously exact in his dress. He speaks freely upon the affairs of the voyage of the Echo, and states that he was driven to engage in the slave

consulat Jeruselem.

"In attriking contrast with his conduct was that
of Captain Bell, of the United States ship Ocestellation, then a Alexandria, and the only American armed wessel in the liseliteranean. He not
only refused to go to the assistance of his safering countrymen and countrymen—on the ex-

PAIR OF THE . State Agricultural Society.

ible from the place which so lately all were struggling to reach. The total amount taken at the gate, we are informed, is \$6,700, which with \$1,000 derived from rent of booths, &c., on the grounds, make the gross receipts \$7,700, from which figures they will not vary very much.

OOR DEELLS AND SOWERS.
We are now come to the grain drills, of which here are eleven on the ground. The list is as ollows : The "Young America Drill," the name being all we could learn in regard to it, a drill patented, and manufactured by Geiss & Brosina, Belleville, Ill.; "Selby's Patent Grain and Seed Drill." built at Peoria, of which there are two machines, one intended as a premium for the nest ten acres of drilled wheat; Pennock's Pa best ten acres of artised weak; removes re-tent, built at Belleville; Lut's Patent, Laky-ette, Ind.; Hamilton's Patent, Bloomington; Kuhn & Hains's Patent, Dayton, Ohio; Buck-eye Drill, Springfield, Ohio; C. B. Brown's Pa-tent Self Clearing Drill, Alton, Iff. This is in-tended for working in foul ground where the ordinary machines would become useless from ordinary machines would become useless from cheking, and is, we think, admirably adapted to the purpose. Its peculiarity consists in its being furnished with vibratory blades which work immediately in front of each fluke, and which effectually out to pieces any rubbish that may gather thereon. The blades are operated by simple mechanism, and the invention is, dai's Sowing Harrow. Also one of Thompson's invention for rolling grain. Among the broadcast sowers, is a sower or drill, drag and roller combined, by A. N. Carpenter, of Galesburg, no doubt a good machine. An invention used in connection with an ordinary wagon for sim-ply sowing. Also a broadcast sower and hartow, "Sage's Patent," Chicago, exhibited by Geo. Lindley, for which are claimed the usual

derate exactness of quantity and even Several corn planters are oil skithition, and between some machines we notice signs of bitter rivalry. Uses, of Bloomington, exhibits a very simple machine for planting ground "laid off one way;" Brown, of Galesburg, another for the same sori of work, and also a planter doing away with the necessity of "laying of" at all. Houghton's Patent, from Bloomington, does the same by the aid of more complicated mechanism. A. N. Carpentar, of Galesburg, also produces a machine for the same work, but on entirely different principles. Thus it will be seen that Bloomington and Galesburg are the rival cities for the honor of the best corn planters. Each, we believe, cerried off blue ribbona. Other plantiers are elsewhere noticed. A machine for planting postoces either in hills or drillis, and suitable also for corn, is exhibited by the patentee, Mr. Hutchiason, of Louisville, Ky.

WAGONS AND CARRAGES. for the same sors of work, and also a plante

G. A. Smith of Decating, exhibits three covered carriages and three buggles. Wild & Keinick of Highland, Madison County, 4wo carriages and two buggles bearing off three ribons. I. C. Carpenter, of Mis Yernon, a frame wagon another wagon with on name on it to funrortalize the naker, and a set of wheels complete the show of "rolling stock." O PAN MILIS. TA H. H.

The list of Pan-mills includes Grant's patent, exhibited by Smery, made by E. C. Clark of Ashley and Richview, one in the condition of the wag-on mentioned above. J. Shipley's patent, a very nest machine; and four mills manufactured in Aurora by H. N. Goodrich, a buld which is spoken very lightly of by all who-have used them.

THERMING MACRINES.

The following is the fist of threshers: Emery's two horse thresher and cleaner, Pitt's machine from Chicage, deing good work: a "Ralsten" machine, built by Munn & Co., Louisville, Ky.; a ten norse machine built by Chrik & Utile, Ky, a ten norse machine built by Chrik & Utile, Ky, a ten Ill.; one from Hamilton, O., built by Osens, Lane & Sper, and Griven by a Viry heat and portable juit in St. Louis, which being

two screens, by which the chess, ms well as all all sticks and trash, are separated from it. During the short trial on the grounds the machine gave entire satisfaction, and the blue ribbon was promptly tied on. Mr. Mofflit, the patentee, has heretolare reserved to himself the right to manufacture, but is now about to retire and throw the enterprise open to the public. Pitts' machine took the 3d premium,

CORN SERLLERS.

The corn shellers, of which there are several on the ground, pext claim our attention. Kenniston's Frams exhibit a very simple and effective hand machine. King, Gilman & Co., of Ottaws, abow a very good sheller, operated by one horse. The power is nest, simple and oprathle, and it is claimed that with this machine from 400 to 600 bushels of corin may be shelled per day; it also cleans and sacks, and will do prestly good work with corn in the bush. Disman's patent, manufactured at Planneld, Will county, is something similar. Van Horn's patent, Magnotis, Putsam county, is a very sample and effective power machines. Reading's patent is well known, and is now mana-

rery simple and effective power machine. Read-ing patent is well known, and is now mane-factured in Peeria. Johnson's, from Pennsyl-vana, completes the list.

CIURI MILLS.

Among the eider mills, Krauser'e patent, Louisville, Ky., were the blue ribbon. Nich-ols patent, manafactured at Bunker Hill, Hi.; The Beckeys mill, Springfield, O.; Geins & Brostin's Patent, Belleville, Mi. Machin.

The only hay press is one of Ingersoll's patent.

Te-day a corp and cob mill, Scarlett's patent, Aurors, was put up and tried, giving satisfaction.

A corn busker, C. N. Lewis's patent, successfully did its work.

To the collection of articles in the Mechanical Hall have been added an assortment of stoven and aggiestantial botters by Resor, of Cincinnati, Masses portable apparatus for manufacturing gas, samples of safes and vault locks, (Lillie's), specimens of brass and from work from Mound City, a collection of Surveyor's and other instruments from Troy, N. Y., that a model of an investion called "Cook's portable sugar evaporator." This is so constructed that the juleo of the cases flowing in at one extremity of the pan passes over a large extent of heated surface, and off at the opposite soft in the same being restated in his passage by an ingenious arrangement. John J. Squire, of Bunker Hill, is spent for this State.

Beer's space machine only arrived within a few hoors before the close of the Fair. Several other things were equally late, among which were samples of sawad lamber, models of sawing machines, portable feeses and other articles.

Of things overlooked in former lotters are: A valuable invention for "torwing," mould-boards of plows by Fireber of Februs, Favor's camp bedessade, sold by Brown & Hilliard of Chicago; these we know from appriators to be a valuable invention also.

A draining plow cocquired copusiderable space, but doubts were substanted of its practical efficiency. A anner noved machine was a self-tool-ing earl invented by Manning & Wickershum of Springfield, still, it is intended for removing earl invented building, and is no doubt of practical utility. The erronants (Mesers, Bannister and Thurston,) immediately proceeded to unfasten the car, and to remove the neiting from the balloon, which gradoully furned over, finally resting with the neck upward. Mr. Thurston got astraddle of the neck upward. Mr. Thurston got astraddle of the neity valve, which opened inward, at the same time requesting Mr. Bannister to untie the sace; of the tag. The latter, Mr. B., who was busy with the neiting, neglected to do. The moment the neiting was off, the each suddenly arose, with Mr. T. still clinging to the valve. Mr. B. Instantly grasped for the ascending balloon, but Thurston exclaimed—"Hold on, Bannister, she will soon come down again;" for he supposed that his common down again; "for he supposed that his common down again; "for he supposed that his common down again; "for he reck of the mck, which a outle, of course, soon refleve it of gas, and therefore of its upward tendencies; but he was doomed to a terrible disappointment. Up, and up, the balloon ascended with its precious burder of human ille, and, when last seen by the horrised Bannister, was full two miles high and sailing rapidly to the northward. Mr. B., sick at heart, and dreadfully alwe to the extreme danger of his common, the property of the property of his common, the property of his common, the property of the property of his common, the property of his common, the property of the property of his common, the property of the pro

Railway Matters.

that the saving of the distance on the contem plated new route for this road over the one nor travelled, (about 7 miles), would be considered a strong inducement for its construction but for

officers of the Society and the citizens of Centralia also for the very able manner in which they provided for the secommodation of their guests. May our State Fair never be held

The friends of Douglas seem determined to get up acrowd to hear him, wherever he goer the railroad company only charge half-fare to all persons who go to hear him speak, and the Mayor of Cairo had the magnanimity to steam up the Dan Pollard vanterday warrains.

A meeting of the friends of Douglas was held in Jonesbore the other day to "make arrange-ments" for the reception of Senator Douglas, and the immense and enthusiastic meeting num-

tion—sufficient not only for additional station service, but also for interest and all other expenses necidents to an intependent road. It would but require all stockholders to become acquainted with the country and its resources 1.1-butary to this contemplated road as surveyed two years go, to arrive at the same conclusion.

The report says the distance saved by the construction of the new line will be about as miles, but on close inspection of the surveys it will not be dissorted that I am over the varveys it will not be dissorted that I am over the varveys it will not The reports new line will be survey it will not but on close inapection of the surveys it will not be disputed that I am correct by stating it to be full seven. There are less regular trains per day passing over this distance (ave sart and three west) so running 70 miles which would be saved, on the new line, (soit mentioning the irregular or wild trains that are all times more or less passing over this section.) At a low estimating the control of the

guesta. May our State Fair never be held under worse suspices.

Douglas in Egypt.

Trom the Cairo Times and Delta (Democratic.)

His RECEPTION AT CAIRO.

Yesterday morning, about 9 o'clock, the James H. Locas, with the filliputian giant on board, announced her caming by the report of a cannon, whereupon the committee appointed for the purpose hoisted their collars, straightened their pair and mestaches, wiped the last. "Icket" off their lips with their coat sleeves, and made tracks for the wharf boat. As soon as the boat landed, a cannon brought from Mound City for the purpose (the brass piece here is a Sachana cannon, and would certainly have bursted on such an occasion) commenced beleding. The committee then went to the Lucas. Judge Duglas was visible, and the chairman said "How Gye do, Mr. D?" as natural as possible. Mr. D. replied, "I am tolerable!" The rest of the committee were then introduced to the circus giant, and a procession was formed.

THE PROCESSION.

In the lead, was Mr. Douglas! adorned on one side by Mr. S. S. Taylor, atx feet two or seven inches high, a don the other by Mr. S. S. Brooks, for feet four inches high. Mr. Douglas had on a white hat and a coat. The b lance of the procession commisted of fifteen or twenty persons, who marched up to the top of the levee, where they were met by four hauners, one flag, and ten or differen more people, who joined them promiser, and the promiser, and the procession commisted of fifteen or twenty persons, who marched up to the top of the lave, where they were met by four hauners, one flag, and ten or differen more people, who joined them promiser, who marched up to the top of the lave, where they were met by four hauners, one flag, and ten or fifteen more people, who joined them promiser, who marched up to the top of the lave, where they were met by four hauners, one flag, and ten or fifteen more people, who joined them promiser, who marched up to the top of the lawes of the faithful had collected at the ourse, and one of them proposed for Sam Marched to upon this question individually, some ma deterred from looking on it favorably, thin that the earnings of the road will be used this purpose; but this is not so, as the an report informs us the means are already pr report informs us the means are already provided for the construction of this independent rack, and by a reference to the records in a counties through which this road passes it will be seen that the means are not only provide but can be used for no there purpose; therefor it will in no wise affect the dividends while being incressed, and mill affect them only being incressed, and a advancing the value of the stock of the whole road on its completion. Again, some may bedeterred from looking of this subject favorably from the fact that man roads have become enhanased by the building, or assisting in the construction of internity of the subject favorably from the fact that man roads have become enhanased by the building, or assisting in the construction of internity of the subject favorably from the fact that man roads have become enhanased by the building of, or assisting in the construction of internity of the subject favorably from the fact that man roads have and extensions, and have, therefore of, or assisting in the construction of later branches and extensions, and have, therefor made up their mind to leave all extension alone for the future; a wise conclusion, in whit I fully concur, and were this an extension, or branch, I would be one of the last to advocate on the contraction; but not so. We are at presence of the most impertant and useful companion the State, and only a branch. My desire that we should take our proper position wither companies withwhom we are equal if n superior in importante, bring our stock on equal footing in the Eastern market, and the we can do by building, not an extension or branch, but a main such of thirty-six mile connecting our road direct with Chicag through a section of caunty not suprassed the State, so not only increasing our important but what is better 19t our revenue, and it

Chicago, Aug. 30, 1858. Pirrabungs, Forr Warns & Chicago R. R.— The earnings of the Pittsburgh, Fort Wayne & Chicago Railroad Company show very favorably, in view of the extremely low rates at which it

From Preight

From Reut of Road... Mayor of Cairo had the magnanism; to steam up the Dan Pollard yeaterday merains, and send her up to Mound City to bring down free all those who might wish to come. The Mounds, we believe, turned out about fitteen or twenty people, who, immediately upon the landing of the boat, made a rush for a Bologan saisage shop, and stuffed hemselves until they became perfectly torpid, in which condition they were shipped back to the Mound as freight. Increase, (7% V cent.)....

Increase, (14 6-10 % cent.).. Personal and Political.

There having been some talk of supplanting William Pitt Fessender with Gov. Morrill, in the U. S. Senste from Maine, Gov. M. silenced in a public speech last week, and declared unequivocally for Mr. Fessenden's re-election. -Senator Benjamin has declined the Spanisission, for the reason, probably, that he would prefer a re-election to the Senate. It is said that Mr. Belmont would be glad to step into Dodge's shoes. Mr. Belmont, it will be recol-lected, is a large capitalist, connected with the Rothschilds, and he probably hopes to make a good bargain for Cobs.

The following elegant and noble sentiments were uttered a few days since by the Hon. James tinghes, of Indians:

"If every stamp in Kassas were a negro, every tree bpon her soil a slave driver, and every twig upon the trees a lash to scourge a negro to his daily toil, would vote for the admission of Kansas under the Lecompton Constitution."

An extraordinary memorial has been addressed by 507 Austrian priests to the author of the Concordat, the Cardinal Prince Archibishop of Vienna. In this document, the lower Catholic clergy put forth their grievances in language the like of which has not been heard since the days of the Reformation. The memorial begins with a rough omisught on the absolutistic prerogatives of the episcopacy. "This Concordat," it says, "has conterred upon the bishops many new privileges and a large increase of power; but the priest has to bear the whole odium of the indignation and of the moral resistance which the hated Conventions has created among the people." "There is no doubt," the document continues in a subsequent paragraph, "but that our religion has become the chiefe document for the most moderate men with respect to the antiquated, mediaval ordinances of the Church; and the indignation squints the executors of those ordinances becomes londer and more universal from day to day. This sentiment is the more dangerous as it preads among the main body of the people." The memorial complains of the wretched pay (sometimes less than this of a cabdriver) of the lower clergy, in conseq ence of which they are driven to the collection of fees and taxes which are the source of the most discrassivel and disquasting conflicts with the —A late Weshington dispatch says: —"Some sensation has been created here to day by the report that a letter from a prominent friend of Judge Dunighs as \$1. Lenes predicts his defeat in Illinois." The certainty of that event is so strong in this quarter that nobody is in the least excited by its prediction. excited by its prediction.

the successful completion of the Alientic Tele-graph, Peter Cooper, thinking he had lost a large pile of money, exclaimed, savagely, to a friend: "I wise that confounded Telegraph was at the bottom of the ocean." —The Administration counted upon a gain of one member in Majoe, certain, and strongly hoped for two more, any a Washington dis-patch. The Administration is not a little cha-grined at the result.

cab driver) of the lower clergy, in consequence of which they are driven to the collection of fees and taxes which are the source of the most disgraceful and disgusting conflicts with the people. Religion is thus made to appear in the light of an insufferable burden, and agitators increase the ill-feeling by directing statention, not to the parary of the lower clergy, but to the luxury and abundance in which the bishops are reveiling. In the next place the politicoers also because the lightest of monkhood, and demand the abolition of these begging orders and the appropriation of their revenues to the maintenance of the really working priests.

A more imperisant demand follows. It is for the abolition of ceilbacy, on the ground that the impossibility of extering into the married state renders the priest the victim of anspicions, of sneering and contempt, and produces laxily amongst the clergy, thus readering them continued to the potential of the same about he introduced as to make the lower clergy about he introduced as to make the lower clergy no longer appear in the odious light of oppressors of the poorer classes; and that the priests, by the abolition of the law of ceilbacy, should be restored to the common ties of family and appears in the law of ceilbacy, should be restored to the common ties of family and appears in the section. Philadelphia, to again officiate in the discome of Philadelphia, because during a recent visit to

—The Washington Union speaks of Douglas' friends in Illinois as "Kinderhook philosophers and Buffaio heretics."

"At the Douglas convention of Lamille county, the first business transacted was to take a vote to sillow one of the delegates to read an advertisement of a stolca horse. The sagacious owner knew exactly where to go to find the thief." There is a nurried lady in Salem, in good health, whose weight when in full dress is only seventy three pounds. She has been married len years, and is a model bousewife, performing

Bark Rossert—\$3,000 Stours.—The Union Bank of Kinderhook, N. Y., was robbed last inght, the safe being blown open by guspowder. Some six or eight thousand dollars of the noise of the Bank were taken; and as other papers left undisturbed in the safe are scorched by the suplouno on the ends, it is presumed that the bills taken are likewise in the same condition, which may help in the detection of the robbers.—Albany Statesman, 16th.

Hisavy Fossers or Drayers sy Creave.—An extensive forgery of drifts by three young Onbane has just been brought to light. The accused parties are Charles P. Delacroix, Frederick Ludwig, and Pedro Alvarez Roiseherez, and over \$100,000 is stated to be the aggregate amount of the forgeries. The secured parties, following their arrest, were taken befordant the papers forthwith before the Urand Jury; the prisoners were locked up in the Toombs. The three prisoners are young and fine looking men, but take the whole affair very coolly.—N. Y. Tones, 16th.

Kanas Land Sales.—Washington, September 15.—The President has ordered the further postiponement of the Kanasa land sules till July next. The reason for this is stated to be the nancial pressure in the country, and the consequent insbility of settlers to prove up and pay for the pre-engine to stoury, and the consequent insbility of settlers to prove up and pay for the pre-engine to set lime fixed by the proclamation, ordering the sales in November. The lands comprise three millions for acres. (From the London Times, August 20.)
The acultiments of exultation and delight which have been excited on both raides of the Atlantic by the completion of the great ocean telegraph hear the best of all testimonies to the grandeur and utility of the work. It is upon the popular mind that the magnitude and consequences of this mighty enterprise have been most strikingly impressed. Before congratulations could be transmitted from government to revernment, the results of the contract of the con

schieved. The secular authorities followed with equal animation and real. Meetings are to be beld, resolutions voted and festivals given, and we may already learn a lesson from our American breshren in the appropriate recognition of mational service. The expedition from which the Agamemmon has so successfully returned was at least as important and as beroic as easy of those of the Harvard University, notices it as a fact

and is rapidly increasing in brightness and raing higher above the horizon at that hour.

Singuital and Payal Accident—A man employed on the Detroit and Port Huron Relifored came to his destit day before yesterday in the following singular manner: He was employed in clearing timber from the line of the road. While engaged in chopping a rain storm came up, whas he sought shelter from by crawling into a large hollow log. White he lay there, having either fallen salesp or found his quatters so good that he was loth to forsake them, having either fallen salesp or found his quatters so good that he was loth to forsake them, a large tree, which two other men were cutting in the violatity, fell upon the log, smashing it in and killing the man instantly. One of his legs and one of his arms were broken, and the left side of his head crushed in. The falling of the tree was in quite the contrary direction from that anticipated by the choppers, who were aware of the quarters the man was occupying.—Detroit Fred Fress, 11th.

How PRINGENS ARE TREATED IN NEW YORK, Jait.—It appears from legal proceedings published in the New York papers, that an Sogilar salior boy has been confined about eight months in the Eddrige attent street prison as a witness in the Eddrige attent street prison as a witness in the Eddrige attent the New York Part has he besides the his he had to be a for the prison when he was to the New York Part that he besides the his he comments to New York Part that he contracts the prison was a contract to the prison as a witness.

little before it touched the water, a sea gaing a latigued, no doots, ster a long flight, perchas on ft, and his claws getting rest in the tar with which the cable was coaled, he was mable a extricate them, so that the bird was dragged down under water and drowned. He made deeperate efforts to save himself, but to no purpose, as he stuck fast, and when he found himself going down his despairing screams sounded far scream the waters. The strangeness of the occurrence, and the terrible agony of the poor transcream to the contract of the c

ere purchasing elsewhere.

The days of wonders will never cesse. The days of wonders will never cesse. The laying of the Atlantic Cable was a feature of the age, and the next on the liet is a "Balloon Race;" Some days age Mons. Godard, the well-known Aeronaut, who has made several wessers New York, challenged Prof. J. H. Steiner, of Philadelphia, to a rease with their small halloons. The conditions to be observed were, that the two balloons were to be infirted with the same times and place, and the same quality of gas; that the one being ready first should wait for the other, and both start at the same time; that the trial should not be decided by the height statined, but the one landing the greatest distance from the starting point to be declared the winner.

This challenge was put forth by Mr. Godard, and was especially intended for Prof. Steiner, who happened to be ballooning in the neighborheod, and that gentleman promptly secepted it, with the modification that instead of using their small balloons, they should make the trial with large ones, so that the race, instead of being for "a few miles over the continent," should be for as long a trip w can be made, "over land and sea." Another condition made by Prof. Steiner is, that the race shall take place some time during the month of October, and that Cincinnati shall be the starting point. His reasons for this are the inland locality of our city, and the facilities offered by our gas works for inflating. ONES' NEW IRON FRONT STORE WO. 203 RAWDOLPH ST...

the facilities offered by our gas works for inflating.

The event will be one of the most exciting which has transpired in the region of our city and pick of the most exciting which has transpired in the region of our city in a long time. Mr. Godard has something of a reputation as a balloonist, and we know Frof. Siesiner to be one of the most interpid Aeronauts that ever made a trip to the clouds. We have sailed with him in his "Pride of the West," through the misty atmosphere, over two miles above terra-drims—heard him tell stories, creak jokes, and sing songs, sway "up yonder," long after objects upon earth were undistinguishable; when the Genesee River appeared like a rivulet, and the Eric Canal looked like a grack in the sand. We recollect how the daring young American Aeronaut, as we were driven isward Lake Ontario, two miles above earth, proposed to venture a trip toward the Queen's dominions, just for the "fun of the thing," and how we asked to be excused from a water excursion on our first trip to the clouds. We bear in remembrance that first thump on the ground any we descended, the resh through the eorn field, before the smober caught in the roots of a bush, the rebound fifty feet in the sir, to the length of the rope, and then down again, a little more genity, yet hard enough to send a man's dinner beyond the action of the digestive organs: New and Riegant Designes, from the best Ma ries in Boston, New York and Philadelphi DINING ROOM AND COMMON FURNITURE, IN GREAT VARIETY. Goods Manufactured Here To Order Out of the BEST MATERIALS.

A Word to our Fair Readers.

Haure Tex Bass or Brauty.—"Besuty is only skin deep," says the proverb, and unquestionably a pure, transparent complexion is essential to famale lovelinets. Such a complexion is an evidence of health, while sallowness, opedity of the akin, respicion, dry increatations, and all external inflammations, are indicative of a disturbed condition of the stemach and the liver. Upon these organs the famous sperient and tonk known as Holloway's Fills, sets with a directness, precision and rapidity unparalleled in medical science. But the distinguished chemist and pathologist to whom we owe this inestimable remedy, has coupled with it an external application which removes every ostward diagurement occasioned by impurity of the animal fluids, while the Fills are regulating and renovating the vital machinery within. Holloway's Unitment seems to purge the vessels of the skin of every irritating particle, and to clarify and impart a roseate hue to that deficate and sensitive everlops. We would say to the ladies who value a smooth, fresh, unspotted complexion, avoid all countries. They suppress the natural evaporation of the skin, drive the sorid humors which seek a vent through the pores into the sources of vitality, and she who contrives by their aid to impart a temporary beauty to her face neck and arms, is but a whited sepulchra, with "dead corruption mining all within." If our fair readers will beet house townsel, they will banish washes and powders from their dressing rooms, and seek to plant the lifty and the rose permanently on their cheeks by the use of Holloway's remedies. If the blood is overcharged with hile, the Pills will soon rectify the mischief, and send a pure, rosy, healthful stream through every artery and rein. If sucers, pinchiff, and send a pure, rosy, healthful stream through every artery and rein. If sucers, pinchiff, and send a pure, rosy chait in any of its medical to the very roots of the excresoner, will remove it, without leaving a discoloration or a scar."—A. Y. Not. A Word to our Fair Readers. OUR MAMMOTH STOCK We are prepared to prove that Faraltate of Every Grade, from the Kloben to the Fa-low, Will be Furnished from Our Fatabli tement at Prices Lower than any Home in the West, 199 ---- Lake Street, ---- 199
